Work Experience

Freelance

Nov 2025 - Present

- Built and deployed an 11-page corporate website with strong SEO, accessibility (Lighthouse 100), and performance optimizations; currently integrating a CMS for dynamic blog and project management. Visit the website: [Safecom](https://www.safecom.com)
- Working on another website for a CA Firm

Finnaux Techsolutions • [Visit Website](#)

May 2025 – Nov 2025 (Probation: 6 months, Full-time: 1 month)

- Built a payment portal enabling borrowers to track loans and complete installment payments using a secure third-party payment gateway.
- Developed and deployed a quick loan application for client websites to generate loan leads using Next.js, Tailwind CSS, and a PostgreSQL backend.
- Implemented core financial features, including automated generation of amortization schedules and loan statements.
- Built the initial CMS and routing for the company website using Strapi to enable easier content updates.
- Collaborated on feature development and bug fixes within a Nest.js backend.

Open Source Contribution

- Contributed to MDN (Mozilla Developer’s Network) web documentation by fixing typos and bugs in sample code snippets and examples. The bugs fixed in examples and code snippets are related to HTML, CSS, JavaScript and maintaining accessibility guidelines.
- Contributed to Hero UI (component library) by reporting bug in code.
- Contributed to next-yak (CSS-in-JS library for Next.js) by reporting bug in code and improving documentation.
- Contributed to Base UI (un-styled component library) by reporting bug in code.

Education

Bachelor of Technology | *Poornima University (2025)* | **6.89**

Higher Secondary Classes | *Polkaji Shikshan Sansthan (2020)* | **67%**

Secondary Classes | *Tinsukia English Academy (2018)* | **87%**

Projects

Frontend Mentor Projects
